DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13, 14 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the definition of substituent A, the phrase "...or a group corresponding thereto which contains a heteroatom..." is unclear. The examiner respectfully suggests deleting the phrase "corresponding thereto."

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is insufficient antecedent basis for the limitation "...general formula (3) by the process of claim 1..." in the claim. Claim 1 has been canceled.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is insufficient antecedent basis for the limitation "...general formula (10) by the process of claim 15..." in the claim. Claim 15 has been canceled.

Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 1621

regards as the invention. It is unclear why a definition for a variable X is defined within the claim text when no such variable appears in formula (12). The examiner respectfully suggests deleting the definition of X.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is insufficient antecedent basis for the limitation "...by the process of claim 1..." in the claim. Claim 1 has been canceled. Additionally, generally formula (4) is incorrect. The oxygen atom should be doubly bonded to the carbon.

Allowable Subject Matter

The subject matter of claims 13, 14 and 16-20 would be allowable once the above rejections have been overcome. The following is a statement of reasons for the indication of allowable subject matter:

The claims, once the limitations of canceled claims 1 and 15 have been appropriately incorporated into the claim text, would be allowable. Canceled claims 1 and 15 correspond to patented claims 1 and 10 allowed for reasons of record in the parent application (now US 6,570,039), therefore claims depending from these claims would be per force also allowable.

Application/Control Number: 10/695,809

Art Unit: 1621

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 571-272-0638. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
